

## Material Formulations

Product	Material Description & Comments	Color
Polyslick Virgin	Virgin UHMW with no additives or fillers	Natural and Black
Polyslick Virgin Colors	Virgin UHMW in various colors	Custom as per customer requirements
Polyslick Repro	Reprocessed UHMW. More economical. Not FDA approved	Black. Others available upon request
Polyslick AS	Anti-Static for prevention of static electricity buildup	Black
Polyslick CDE	Conductive for extreme reduction of electrical resistance	Black
Polyslick CP	Ceramic impregnated. Best wear resistance & improved dimensional stability	Olive Green
Polyslick GF	Glass filled. Improved wear resistance and dimensional stability	Light Blue
Polyslick GXL	Glass filled and cross linked for better wear resistance and dimensional stability - For lining applications	Royal Blue
Polyslick MF	Molybdenum disulfide filled for reduced coefficient of friction. Not FDA approved	Steel Gray
Polyslick OF	Oil filled for reduced coefficient of friction. FDA approved	Gray
Polyslick UV	UV stabilized for outdoor applications	Black. Natural available upon request
Polyslick XL	Cross linked for improved dimensional stability	Black
