

ReCycle Buy Back Program

For more than four decades, we have recycled products that we put into the environment. We began recycling internally and later, when our products reached end of life, we recycled them from our customers. Now, we are going a step further, by taking back additional products not manufactured by us from our customers.

We are serious about our commitment to **recover**, **recycle**, and **reuse** plastic products to better care for our environment and **reduce** landfill waste.

Recyclable materials that meet Polymer Industries acceptance guidelines will be eligible for return shipping at no cost. Amount of ReCycle credits will be determined by color, shape and quantity.

If you are interested in participating in the ReCycle Buy Back Program, contact us via email at recycle@polymerindustries.com

Guidelines for Acceptance:

1. Materials: UHMW and HDPE ONLY
2. Materials must be separated by type
3. Materials must be clean and clearly labeled as to type of material
4. Packaging must be in Gaylord boxes or skidded
5. Minimum pounds for return: 10,000 pounds
6. Must send photos or video of packaged product prior to receiving authorization to return
7. Email photo/video with material and contact information to recycle@polymerindustries.com
8. If the returned material meets acceptance guidelines of sorted, clean, packaged and labeled, an authorization number will be sent to you and the number must be included on the return product shipment.
9. No contaminated product will be accepted. (floor sweep, wood shavings, dirt, or trash of any type) Contaminated product could forfeit your future participation in our program.
10. International shipments to be negotiated.
